PROFESSIONAL WORK EXPERIENCE

HeadBlocks, Full Stack Developer (Part-Time)   Nov, 2017 - Present

➔ Developed HeadBlocks one of the flagship products FitFinder with Angular and Web API using EF.

◆ FitFinder is an application tracking system that helps recruiters to manage the end 2 end recruiting process.

◆ Developed the stages of onboarding process of candidates, scheduling and managing interviews, publishing jobs.

◆ Developed and managed different levels of application screening and assessment criteria.

◆ Integrated Google Drive API for managing candidate resumes according to jobs.

◆ Deployed the application on AWS EC2.

◆ Demo video: http://bit.do/fitfinderhb

➔ Planned, developed and maintained HeadBlocks another product hodoo; a restaurant management web application with Angular and Web API using EF.

◆ Developed features of point of sale, multi-level inventory management system, bill of materials and order reporting.

- ◆ Deployed the application on AWS EC2, Azure App Service, Heroku and Firebase.
- ◆ Developed the whole application by myself.
- ◆ Demo video: http://bit.do/hodoohb
- ➔ Effectively translated client requirements into application designs.
- ➔ Trained one intern developer in learning Angular and Web API, helped him to work on a demo project.

EDUCATION

Green University of Bangladesh   June, 2020
B.Sc. in Computer Science and Engineering

CERTIFICATION

Web Application Development - Dot Net (BITM)   Oct, 2017
